ACTIVITY REPORT

I. BACKGROUND

The process of tooth extraction is still considered the best solution for broken or cavities. Some people think that this process will make themselves free from the annoying pain caused by the dental problems they are experiencing. However, basically not all dental problems will be solved only by the extraction process, especially if the condition of the teeth still allows for treatment. This is because the process of tooth extraction should not be too fast (before the time) or more than the time. Further consultation with the dentist is needed to find out when is the right time for tooth extraction. However, the lack of knowledge about dental and oral health in the community makes health promotion important to do.

Health promotion aims to provide knowledge to people who are still healthy as well as patients and their families about diseases and their prevention. To foster public understanding and awareness about tooth extraction for broken or cavities, a radio broadcast as a result of the collaboration between FIT Radio Semarang and the Faculty of Medicine Undip was held on Tuesday, February 1, 2022, with the title "Not All Problems with Broken and Perforated Teeth Must Be Removed" together. resource person drg. Nadia Hardini, Sp. KG. This activity is a step to arouse awareness and interest of patients, families, and the community to play a positive role in promotive, preventive and curative efforts on dental and oral health.

II. DESTINATION

- General purpose

The creation of public knowledge (radio listeners) about the process of extracting teeth for broken and cavities, including prevention so that the teeth are not extracted, the stages of extraction, the consequences if the teeth are extracted and not replaced, and what should be done if the teeth have been extracted.

- Special purpose
The implementation of community service activities as a means of applying the knowledge they have, namely dental health.

III. TIME AND PLACE OF ACTIVITY

This community service activity was held on Tuesday, February 1, 2022, at 19.00 WIB, at FIT Radio Semarang with the theme "Not All Problems with Broken and Cavities Must Be Removed".

IV. ACTIVITY DESCRIPTION

- Preparation
Preparation for community service activities as a resource for the FIT Radio Semarang talk show, namely by compiling material for short lectures and questions and answers.
- Implementation
The implementation of community service activities as a talk show resource for FIT Radio Semarang is with a short lecture method followed by dialogue or question and answer via telephone and broadcast live to radio listeners. The summary of the results of the dialogue are:
 1. *Should a tooth with a large cavity be extracted?*
Teeth with large and deep cavities can still be saved and functioned again if the cavities are still above the gums. We recommend that you consult with the nearest dentist so that you can check whether the tooth can still be preserved or must be extracted.
 2. *Should the tooth extraction be replaced with dentures?*
Extracted teeth should be replaced with dentures because the loss of teeth will cause changes in the arrangement in the mouth so that it can cause changes, including shifting the next tooth or the tooth above it, so that it will cause new problems.

- **Report Generation**

Preparation of reports on community service activities as resource persons for talkshow FIT Radio Semarang, namely by collecting supporting files, summarizing the results of the talk show into reports on community service activities.

V. ACTIVITY PERSONNEL

Personnel involved include:

- Source person : drg. Nadia Hardini, Sp.KG
- Radio announcer : Firmansyah

VI. BUDGET

Activity Budget : Independent (Resource).

VII. CLOSING

Thus, we have prepared this activity report, so that it can be used properly. We would like to thank all those who have supported the implementation of the activity.
